Savings ROI Report

Customer	Siemens · SI GSW CLO (Helios · Integ · Kronos)
Period	Oct 2025 – Sep 2026 (last 12 months, CAST API list prices)
Generated	02 October 2026
Report Type	Internal

Key Performance Indicators

Total Saved (12 months)	Savings Rate	Net After CAST Fee	Return per $1 of Fee
$526,923	**33.5%**	**$357,284**	**3.1×**
vs no-CAST baseline	of baseline infra cost	savings – platform fee	savings-to-fee ratio

ROI Breakdown

Metric	Result
Total Actual Savings (12 months)	**$526,923**
Baseline Infrastructure Cost (no CAST AI)	**$1,573,732**
Optimized Cost After CAST AI	**$1,046,809**
CAST AI Platform Fee (€5 × avg prov. vCPU)	**€157,074 ≈ $169,638**
Net Savings (Savings – Fee)	**$357,285**
ROI on Platform Fee	**211%**
Savings-to-Fee Ratio	**3.1×**
Fee Payback · Net at Siemens' rates (48–58% of list)	**~11 days/mo of savings · still $83k–$136k net**
· ngm-helios-eks	**saved $220.8k (27.2%) · fee $91.9k · net $128.9k**
· ngm-integ-eks	**saved $289.2k (40.3%) · fee $73.7k · net $215.6k**
· ngm-kronos-eks	**saved $16.8k (38.2%) · fee $4.0k · net $12.8k**

Savings Driver Breakdown

Driver	Savings ($)	Savings Rate
● **Node Autoscaling**	**$526,923**	33.50%

Executive Summary

Internal ROI analysis for Siemens SI GSW CLO — ngm-helios-eks, ngm-integ-eks, ngm-kronos-eks. Over Oct 2025 – Sep 2026 CAST AI downscaling removed $526,923 of node-hours at AWS list prices, a 33.5% reduction vs a $1,573,732 no-CAST baseline. With no ARR supplied, ROI is measured against the platform fee (€5 × avg provisioned vCPU = €157,074 ≈ $169,638): net $357,285, 211% ROI, $3.1 per $1 of fee. Integ carries the portfolio (+$215.6k net), helios +$128.9k, kronos +$12.8k. Even at Siemens' effective rates (48–58% of list) net stays $83k–$136k positive — CAST never costs more than it saves.

Source: CAST AI cost-reports API (api.eu.cast.ai, org 07aa3c29…d99a, SI GSW CLO), pulled 2026-10-02; 12 monthly buckets Oct 2025 – Sep 2026. Savings = measured downscaling vs static baseline at AWS list prices (spot: $0, not yet enabled). ARR not provided — fee basis (€5 × avg prov. vCPU, EUR→USD 1.08) reproduces customer-side figures. Costs include compute + storage. IDs: helios 419c39e4…61c7 · integ 1ad1a0bf…fc3f · kronos 6d20eb8e…91b0.
